

Hardwood Balustrade System - page 113

## Decking & Balustrades

On their own or to complement a paved area, timber decks are the warm and natural solution.

Decking	106 - 111
Balustrade Systems	112 - 119

Your deck is the focal point of your garden. It's the place where you gather to entertain or take time out with a book and a glass of wine. Let your imagination run free: blend timber with stone, add walls or balustrades, mix levels and surfaces, and create areas to catch the sun or the shade.

# Decking

## Treated Timber Decking

Create a natural extension to your home. Softwood decking provides a unique outdoor living area in which to enjoy your garden. Manufactured from European redwood, pressure treated (free of chrome and arsenic) to Use Class 3.2, and with a finished size of 32 x 144mm.

Travis Perkins' trade-quality, dual-profiled deck boards, have a heavier cross-section than many others available on the market and are designed to give a long service life. As with all treated timber, if you are trimming to length we strongly recommend the use of Cuprinol Trade Wood Preserver Clear to treat the cut ends (see page 148 for product details).

Decking Profile

Treated Decking	3m	3.6m	4.2m	4.8m
38 x 150mm (32 x 144mm finish)	885815	885816	979968	895114

\*Timber certification differs by region.

Look out for FSC certified products

Photographs are for illustrative purposes only. All photographs are as a guide only and do not necessarily represent the products available. Colours may differ from those shown and stock may vary from branch to branch and is subject to availability. Please ask at your branch for stocking details. Timber is a natural product and products are susceptible to movement according to ambient weather conditions. Fence panel slats may twist but, unless damage results, should return to their original shape. All sizes are approximate allowing for tolerances in the timber components. Product specifications may change without prior notice.

## Hardwood Decking

The beauty and natural warmth of hardwood decking can provide you with the ideal outdoor space. Whether it's geometric or curved, raised or flat, single or multi-level – it makes a fantastic focal point.

ProFi Deck®, Stone Grey

## Slip Resistant Decking

Slip Resistant Decking is specifically designed to provide a durable and effective external anti-slip surface to minimise any risk of slip – even in adverse weather conditions. Ideal for commercial applications. Independently tested in accordance with BS7976: 2002, parts 1-3. Significantly exceeds the minimum classification required for 'low potential for slip'.

### Decking Support

35-50mm / 243457

50-70mm / 243458

65-100mm / 243459

Polypropylene supports hold timber joists away from the deck to help with drainage and to prevent damage to any membrane used. The decking is then fixed on top.

Slip Resistant Decking

# Balustrade Systems

Create an attractive and safe environment for domestic or commercial decks using Richard Burbidge balustrade systems.

## Choosing the right balustrade?

It is important to select the right balustrade system for your needs. We have systems available to suit all applications, from ground level domestic settings up to raised commercial balconies. To help you decide which systems suit which installations, take a look at the decision tree below:

Look out for FSC certified products

HEAVY COMMERCIAL SETTING	LIGHT COMMERCIAL SETTING	RAISED LEVEL DOMESTIC SETTING	GROUND LEVEL DOMESTIC SETTING	GROUND LEVEL DOMESTIC SETTING
Public areas with tables or fixed seating where people may congregate and are not susceptible to overcrowding	Public walkways where people can not congregate	Over 600mm above the ground, up to first floor level	Up to 600mm above the ground	Up to 600mm above the ground
Contemporary FUSION® commercial outdoor balustrade system	<p>Hardwood systems for raised domestic/light commercial settings: Square, Colonial and Flat Baluster</p> <p>Contemporary glass panel systems for raised domestic/light commercial settings - softwood &amp; hardwood</p> <p>Contemporary round spindle systems for raised domestic/light commercial settings - softwood &amp; hardwood</p> <p>Traditional glass panel system for raised domestic/light commercial settings</p>	<p>Hardwood systems for raised domestic/light commercial settings: Square, Colonial and Flat Baluster</p> <p>Contemporary glass panel systems for raised domestic/light commercial settings - softwood &amp; hardwood</p> <p>Contemporary round spindle systems for raised domestic/light commercial settings - softwood &amp; hardwood</p> <p>Traditional glass panel system for raised domestic/light commercial settings</p>	<p>Traditional Colonial System</p> <p>Traditional Square Baluster System</p> <p>Traditional Stop Chamfered System</p> <p>Traditional glass panel system for ground level</p> <p>Traditional metal balusters and panels</p> <p>Traditional timber panel systems</p> <p>Classic glass panel system</p> <p>Classic metal baluster system</p> <p>Classic square baluster system</p> <p>Classic American system</p> <p>Contemporary FUSION® domestic ground level system</p> <p>Hardwood systems for ground level decks: Square, Colonial and Flat Baluster</p>	<p>Traditional Colonial System</p> <p>Classic American system</p> 
	Plus any system from the Heavy Commercial Range			Plus any system from the Heavy Commercial / Light Commercial or Raised Domestic range
	 Domestic = TRADA Tested to 0.36kN/m	 Heavy Commercial = TRADA Tested to 1.5kN/m		 Pressure Treated – See page 167 for explanation of timber treatments

## BALUSTRADE TIMBER SPECIFICATION AND STRENGTH TESTING

All of the Richard Burbidge decking balustrade systems have been independently strength tested by TRADA, the recognised testing body with specific timber expertise, for conformity to UK Building Regulations for either:

- 0.36kN/m Ground level decks up to 600mm above ground level
- 0.74kN/m Raised domestic decks above 600mm plus light commercial decks
- 1.5kN/m Ground level and raised heavy commercial decks

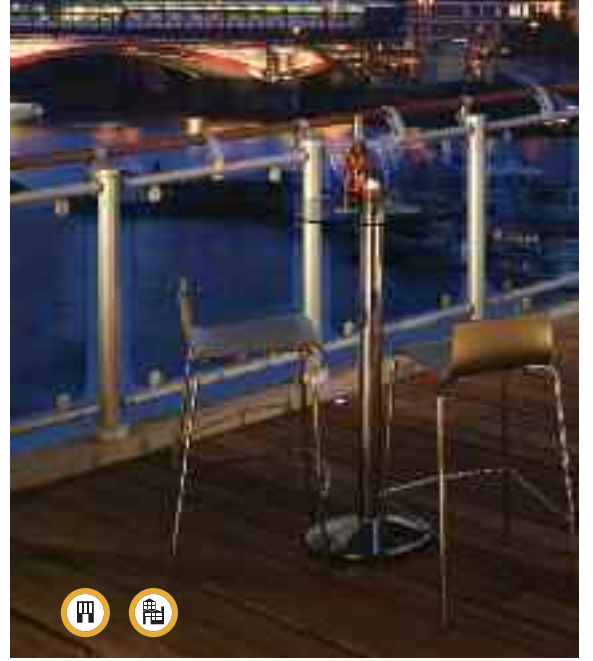

Applicable systems are referenced.

## FUSION® Commercial Outdoor System

Offering two different infill options, Fusion® Commercial is a structurally strong balustrade system, suitable for heavy commercial settings. Integral to the structural strength is the newel fixing, which can be resin anchored into concrete or bolt fixed into timber boards and joists.
